EXPERIENCE CONTINUED.

Coforge / Aug-2022-Jan-2023.

Senior Software Developer

- Worked as a senior software developer at Coforge, where I have taken on leadership roles in project planning and execution, mentored junior developers, and worked on projects for clients in the education and E-commerce industries.
- Improved website load times by optimizing front-end code and implementing efficient caching strategies.

Tata Consultancy Services / Jan 2021-Jun 2022

Senior Software Developer

- Built logistics solution provider with focus on speed, safe and reliable nation-wide express delivery services to e-commerce industry.
- Conducted code reviews and mentored junior developers to improve code quality and ensure adherence to best practices
- Built an intuitive user interface using React.js and Redux that improved user satisfaction by 30%
- Created a custom content management system (CMS) that simplified content creation and editing for non-technical users

Allstate India / 2016-2021.

Application Developer

- It is a web-based application designed and developed to enable policyholders to be insured in an efficient way. It helps the customer to alter the start date of his insurance policy to a timeline earlier than when the policy was purchased. Basically, when the effective date of a policy is earlier than the application date
- I've also gained experience in collaborating with cross-functional teams and implementing best practices for web development
- Refactored existing method to improve adding new fields over 12 sets by automation, resulting in a 30% reduction in development time.
